Latest Technology & Innovation

Triple Power Boom

With the M4x series, the unique, patented and proven Menzi Muck boom kinematics has been further developed. The result is an arm kinematics system that makes this walking excavator a mountain specialist. Without any additional options, the sophisticated arm kinematics ensure that the machine always has sufficient power to move dynamically over the terrain. Thanks to 114 % higher push-off force at the boom cylinder, off-road work becomes easy going.

Chassis

Innovative, patented undercarriage concept with optimum kinematics at ideal force ratios. P-Vation for horizontal and vertical parallel adjustment of the wheels. Powerful H-Drive travel drive for uncompromising working and driving. Perfected hill supports with ideal pivot point to the slope angle.

Design by Alberto Bicego

The Menzi Muck M4x walking excavator series is not only characterized by technology and performance, but also attaches great importance to a modern, innovative design that is functional and practical. By means of strategic design, the components of the superstructure and the cab have been optimally adapted to the requirements of our machine.

I-Control

The intelligent machine control architecture utilize the potential of the walking excavator fully. The software-controlled electronics open up a multitude of possibilities for the hydraulic system. An intuitive operating concept, new functions such as I-Steering, intelligent interfaces with attachments complete the system. The result: increased efficiency, reduced fuel consumption, more direct control, exceptional sensitivity with max. precision and power.

Panorama Grossraumkabine

Best all-round visibility, state-of-the-art cab design, optimized ergonomics for healthy, concentrated and fatigue-free work. Redesigned thermal management with increased heating and cooling capacity for maximum well-being. A clear and intuitively designed 12" touch-screen color display provides full control of the machine at all times. Intelligent details such as inductive smartphone charging, cooled beverage compartment and various storage compartments make everyday work easier.
